Dear Hiring Manager,

I hope this message finds you well. I am writing to apply for the Mathematics Teacher position at your school. I am currently a third-year undergraduate student majoring in Mathematics and Applied Mathematics at Beijing Normal University, where I am enrolled as a government-sponsored teacher education student.

My passion for teaching was strengthened through my volunteer teaching experience in Tibet. During this program, I taught twenty online lessons to fifth-grade students, which increased their average final scores by approximately fifteen points. I also documented detailed learning records for each student and received unanimous recognition from parents for my dedication and effectiveness.

In addition to my online teaching experience, I served as an intern mathematics teacher and home-room teacher at No. 2 Senior High School of Yanhe Tujia Autonomous County in Guizhou Province. Over a two-week period, I taught five lessons, independently completed five lesson plans, organized two unit tests, and graded over sixty exam papers. My supervisor praised my well-structured lesson plans, clear classroom organization, and strong sense of teaching responsibility.

Beyond my teaching practice, I have earned several academic honors, including provincial third prizes in both the National College Mathematics Competition and the Mathematical Contest in Modeling. I also received the Second Prize in the “Green Bamboo” Class Teacher Skills Competition. My language qualifications include Putonghua Proficiency Level 2-A and a CET-6 score of 507. I am proficient in LaTeX, MATLAB, Python, and Microsoft Office.

I would welcome the opportunity to discuss how my qualifications and teaching experience align with the needs of your mathematics department. Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Jikai Shi
